

Levente Szélyes
Owner & CEO

About

Founder and owner of Codespring, software development and outsourcing company, Mr. Szélyes, is one of the dynamic Romanian entrepreneurs in ICT industry.

He started his career as a software engineer, working for companies in the energy, industrial automation and professional video solutions industries. He also worked as a researcher at the Technical University of Munich, within the Information Technology and Mechanical Engineering Department.

In 1998 he founded his first software development company. Soon, he engaged in a BOT (Build, Operate, Transfer) contract with the largest ICT company in Germany.

Later on, Mr. Szélyes initiated a new business venture, Codespring. The company reached EUR 1 million turnover in the first years of activity, and it is constantly growing. Today, the company is proud to have strategic partners from the USA and Europe.

In 2012, he joined forces with the local IT community and took part at the foundation of ClujIT cluster. In 2013, Mr. Szélyes became member of the Supervisory Board at CREIC (The Regional Excellence Center for Creative Industries).

Strategically involved in the region's actions to foster research and innovation, he also set public-private partnerships with local universities and is actively mentoring students and young researchers in information technology.

Current Focus

As a CEO of an agile Transylvanian company, Mr. Szélyes aims to further develop strategic partnerships with specialized software development companies and teams.

One of his drives is to turn Codespring into a challenging software development company in the CEE.

The current focus is to fine-tune collaboration at all levels, while growing the team's technical expertise and setting up innovative software development projects.
